## Portland Multnomah Food Policy Council

The Food Policy Council is a citizen-based advisory council to the City of Portland and Multnomah County. The Council brings citizens and professionals together from the region to address issues regarding food access, land use planning issues, local food purchasing plans and many other policy initiatives in the current regional food system.

### Abstract

Food policy councils (FPCs) have become a popular way to organize various food system stakeholders at the local, municipal, and state levels. FPCs typically build partnerships with stakeholders; examine current policies, regulations, and ordinances related to food; and support or

# What policies were councils working on?

- **Increase access to local/healthy food-low income/children**
- Procurement
- Promote agriculture
- Animals
- Community gardens
- State/municipal planning effort
- SNAP/EBT in farmers markets
- Policy analysis

What policies address food access issues?

## Eat Fresh Maryland Network

Expanding food access in Maryland through farmers markets.

[HOME](#)[ABOUT](#)[BLOG](#)[FARMERS MARKETS](#)[NUTRITION PROGRAMS](#)[AT MARKET](#)[INFORMATION](#)

This Network is a groundbreaking partnership of more than twenty farmers markets, non-profits, and government agencies. It is the first statewide effort to expand federal nutrition benefits redemption at farmers markets.

Our goals are to:

- Expand food access for low-income Maryland residents
- Increase revenue for local farmers
- Foster development of best practices and amongst farmers market

**FOR IMMEDIATE RELEASE**

November 7, 2008

### **Mayor Sheila Dixon Announces Food Policy Task Force**

Baltimore, MD (November 7, 2008) – Mayor Sheila Dixon announced the creation of a Food Policy Task Force to improve city residents' access to healthy foods. The Task Force will be jointly led by the Baltimore City Department of Planning and the Baltimore City Health Department. The Task Force will meet three times, beginning in December 2008, and will release its final report with recommendations in Spring 2009.

Both malnutrition and obesity pose significant challenges in Baltimore, and cardiovascular disease is the city's leading killer. Studies by researchers at the Johns Hopkins Bloomberg School of Public Health have found that many Baltimore residents lack convenient access to healthy foods such as whole wheat bread, skim milk, and fruits.
